

(Junior) Project Engineer (M/F)

THE EMPLOYER

Atcomex, established in Hamme (Belgium) and Kielce (Poland) is an established value in the field of design, production and maintenance of aircraft refuellers, tank trucks and environmental and industrial cleaning solutions. Atcomex is part of the Denoo Group. Due to the dynamic development of the company in Poland, we are looking for candidates for the position of Project Engineer.

JOB DESCRIPTION

As a Project Engineer at Atcomex, you enter into a very challenging and varied position. Your main responsibilities are:

- Development of technical and design documentation (pneumatic, electric and hydraulic schemes) for our products;
- Technical supervision of the project during its implementation;
- Optimization of delivered solutions, continuously searching for new technological solutions in order to optimize costs;
- Support the delivery of the product to the customer;
- Travelling abroad can be part of the job.

PROFILE

- You have completed a higher technical education (preferably machine building, mechatronics, engineer) - school leavers are also welcome to apply;
- You have analytical skills and knowledge of technical drawing;
- You are good with languages. Our activities require knowledge of English (both spoken and written language);
- You are a team-player and able to work independently. You take responsibility in your job;
- You are good with all Microsoft Office applications, Twincat, Autocad and/or Inventor (or willing to develop these skills).

OFFER

- A fascinating position in a family owned company and the opportunity to participate in interesting, developmental and prestigious international projects;
- A permanent contract with an attractive salary package, according to your experience and skills;
- All tools needed for the job;
- Open corporate culture: in this specific technical environment, you can rely on your colleagues to gather all information needed.
